Cheaper. More reliable. That's why SA loves gas.

1. South Australia's electricity prices have increased by an average of 27.4% over the past two years. In that same period, natural gas prices have decreased by 5.1%.

2. Families in SA save up to $712 per year in running costs, by converting from electric storage to instant natural gas hot water.

3. Gas is more reliable than electricity. Natural gas customers can expect an unplanned gas outage of only one hour every 40 years.

4. More SA homes than ever are enjoying the reliability of heating, hot water and cooking with natural gas.
